The abstract of the disclosure is objected to because it has not been presented in the proper domestic form. Correction is required. See MPEP § 608.01(b).

The disclosure is objected to because of the following informalities: page 1 of the specification fails to set forth priority to PCT/JP03/00203.

Appropriate correction is required.

Claims 3-7 and 12-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The variable "X" in the terminology "X-hydrate" has not been defined (claims 3, 4, 6, 7, 12-15, 17 and 18).

The process claims 4-7 and 12-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite and incomplete for omitting essential steps. The claims state that the process for the preparation of the final product involves treating starting product. However, the claims fail to set forth what that "treating" involves.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-18 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Koga et al (European Patent 0 643, 068 A1), Miura et al (European Patent 0 846 697 a1) or Miura et al (U.S. Patent No. 5,959,088).

Koga et al disclose preparation of the crystalline fumaric acid of erythromycin derivatives encompassed by the present claims (Example 57).

Miura et al'697 disclose preparation of a fumarate crystal of the erythromycin derivatives encompassed by the present claims (page 8, compound (VII)).

Miura et al'088 disclose preparation of the crystalline fumaric acid of erythromycin derivatives encompassed by the present claims (column 7, lines 21-68 and column 8, lines 1-23).

The present claims are directed to hemifumarate crystals of erythromycin derivatives and their preparation. Since crystallization process disclosed by the cited art is the same or closely related to the process for the production of the claimed crystals,

Art Unit: 1623

the claimed compounds would have been inherently produced by the references' processes. Therefore, the claimed compounds and processes are anticipated or are deemed prima facie obvious over the cited prior art.
